

# BUFFALO JUNIPER

*Juniperus sabina* 'Buffalo'

**Height:** 12-18"      **Spread:** 4-6'

**Location:** Zone 3, sun, salt tolerant

**Shape:** Low spreading

**Foliage:** Feathery bright green

**Notes:** Soft, feathery branches with an interesting low spreading form. Bright green foliage, retains good color in winter. Excellent as a groundcover, very hardy. Salt tolerant.

# DAUB'S FROSTED JUNIPER

*Juniperus chinensis* 'Daub's Frosted'

**Height:** 3-4'      **Spread:** 3-4'

**Location:** Zone 4, full sun

**Shape:** Spreading

**Foliage:** Blue-green with yellow new growth

**Notes:** An unusually low growing pfitzer for groundcover applications. Visually exciting two tone effect created as tops of blue green foliage is frosted with gold. Retains the graceful habit of its more upright relatives. Excellent coverage for banks and slopes in need of erosion control. Particularly attractive around landscape boulders and rocky outcroppings.
