

# MEDORA JUNIPER

*Juniperus scopulorum 'Medora'*

**Height:** 10-12'      **Spread:** 3-5'

**Location:** Zone 3, full sun

**Shape:** Narrow, columnar

**Foliage:** Blue-green to blue-gray

**Notes:** A slender -shaped variety with a blue-green color. Needs little shearing to produce a narrow-columnar specimen. Slow growing. An excellent columnar blue Juniper, hardy and acclimated for the northern prairie states of the U.S. and the prairie provinces of Canada.

# MINT JULEP (Sea Green) JUNIPER

*Juniperus chinensis 'Monlep'*

**Height:** 4-6'      **Spread:** 4-6'

**Location:** Zone 4, full sun

**Shape:** Arching Branches

**Foliage:** Mint Green

**Notes:** Attractive mint-green foliage on graceful, fountain-like arching branches makes this an excellent evergreen for the foundation landscape. The foliage darkens in cold weather.
