

MOTHER LODGE JUNIPER

Juniperus horizontalis 'Motherlode'

Height: 4-6" **Spread:** 3-6'

Location: Zone 3, sun, well-drained soil.

Shape: Flat, creeping

Foliage: Bright golden-yellow,
burgundy-plum in winter

Notes: Bright golden yellow foliage holds its color all summer in full or partial sun. Found as a sport on 'Wiltoni', 'Mother Lode' changes color in the winter becoming a rich burgundy plum, giving the garden multi-seasonal interest. Use this ground-hugging, slow-growing juniper as a focal point, cascading over stone work, or as a mass planting.
