

WHITE WEEPING SPRUCE

Picea glauca 'Pendula'

Height: 10-20' **Spread:** 4'

Location: Zone 3, full sun, prefers moist, rich soil, but is adaptable to many sites.

Shape: Conical, downward weeping.

Foliage: Blue-green to gray-green needles.

Notes: This stately evergreen has nice blue-green foliage that hugs the trunk, sweeping downward to create a fantastic impression. Its stately narrow, conical habit has moderate growth. It tolerates harsh conditions and is often seen on lists of deer-resistant landscape plants.
