

EMERALD CAROUSEL BARBERRY

Berberis x 'Tara'

Height: 4-5' **Spread:** 4-5'

Location: Zone 4, sun to part shade

Shape: Rounded, upright, arching

Foliage: Deep green, dark red in fall

Notes: A cross between Japanese Green Barberry and Korean Barberry. It combines the hardiness, better flowering and fruiting characteristics of Korean with the plant habit of Japanese. The outstanding red to red-purple fall foliage turns early and remains well into fall before dropping.
