

ASH LEAF SPIREA

Sorbaria sorbifolia

Height: 6-8' **Spread:** 5-10'

Location: Zone 3, sun, moist, well-drained soil.

Shape: Erect, spreading

Foliage: Deep green, fern-like

Notes: Multi-stemmed with foliage similar to a mountain ash; dark green in color. Large white panicle flowers in early summer. Best grown in well-drained soils in full sun and requires moderate moisture. Has no known serious disease or pest problems and should be pruned in late winter to early spring. Can be cut back near the ground for rejuvenation.
