

# NORTHERN BLAZE ASH

*Fraxinus americana* 'Jefnor'

**Height:** 40-50'      **Spread:** 30-40'

**Location:** Zone 3, full sun.

**Shape:** Upright, oval developing into an open, rounded crown at maturity.

**Foliage:** Dark green, purple in fall.

**Notes:** A seedless variety known for its excellent winter hardiness, upright growth habit, and purple autumn color. Outstanding foliage; the leaf is 20% larger than Patmore Ash and the attractive dark-green leaf color is retained throughout the growing season. The growth habit is an upright oval shape during the juvenile stage, developing into an open, round-topped crown at maturity. New twig growth is dark reddish-purple.
