

PATMORE ASH

Fraxinus pennsylvanica 'Patmore'

Height: 50-60' **Spread:** 35'

Location: Zone 3, full sun

Shape: Upright, round to oval crown

Foliage: Shiny, dark green, yellow in fall

Notes: Patmore Ash makes a good selection in either an urban setting or to produce shade and some great fall color for the backyard. Fall color is a bright, attractive yellow that will bring attention to it no matter where it is in a yard. As with most Ash, it is tolerant of wet soils, but will also tolerate droughts. This tree is also adaptable to moist soil conditions, be it clay, loam, sand, acidic or basic (alkaline). This tree is also selected for the winter interest the bark can provide.
