

# WHITESPIRE BIRCH

*Betula populifolia* 'Whitespire'

**Height:** 40-50'                      **Spread:** 20-30'

**Location:** Zone 4, sun to part shade, heat tolerant

**Shape:** Narrow, pyramidal crown

**Foliage:** Dark, glossy green

**Notes:** This is the beautiful native white-barked birch, found growing in the northern states around the Great Lakes. Pyramidal in youth turning oval in maturity. Bark does not peel like River Birch.
