

WEEPING CARAGANA

Caragana arborescens 'Pendula'

Height: 5' **Spread:** 5'

Location: Zone 4, sun, rich, well-drained soil

Shape: Cascading branches.

Foliage: Bright green, finely textured.

Notes: This weeping form is usually grafted on a standard 3 to 5' in height. It forms a rather stiff mop-like, but yet attractive weeping shrub. Its distinctive habit make it useful as an accent plant. Yellow, pea-like flowers in the spring.
