

GREEN MOUNTAIN SUGAR MAPLE

Acer saccharum 'Green Mountain'

Height: 50-75' **Spread:** 35-40'

Location: Zone 4, sun

Shape: Upright branching, oval crown

Foliage: Dark green, red-orange in fall

Notes: This cultivar has excellent heat tolerance, and performs well in dry, restricted sites. The thick, leathery dark green leaves are covered with a waxy coating, and show good scorch resistance. Green Mountain retains its color in dry windy summer weather.
